WINEMAKING

- Harvested and Pressed within 8 hours
- Champagne Press Cycle
- Lees stirred twice a month
- Aged in Oak for 9 months (30% new)
- Cross-flow filtration

We use a champagne press cycle to lower the phenolic content of our wine. The fruit from Lodi goes through both primary and secondary fermentation in order to increase the richness and viscosity, while the Sonoma fruit only goes through primary fermentation in order to maintain its acid, aromatic complexity and the identity of its terroir. Both lots are combined 3 months before bottling and are cross-flow filtered. No chemical additives or adjustments are made except for the addition of the absolute minimum effective sulfites needed.

VINEYARD SOURCES

20% Chardonnay
Sobieski Estate Vineyard
Sonoma Mountain AVA, California

Clone 4, Volcanic Soil

80% Chardonnay
Lodi AVA

The 80% of the fruit that comes from Lodi is located at the northern edge of the San Joaquin Valley, east of San Francisco Bay. Lodi enjoys a similar climate and growing conditions to its coastal neighbors Napa and Sonoma. The two major rivers originating in the Sierra Nevada mountain range that feeds the Lodi appellation have brought soils rich in granitic-based minerals that lend complex flavors to the wines of Lodi.
